1 Service dataModelTranslation

Version 1.0.0, provider TestTranslation, base path `/testtranslation`. Metadata `dataModelIds = [[simpleJson, senml], [senml, simpleJson]]` (supported directions; the TranslationManager looks up `dataModelIds` CONTAINS `[from, to]`).

Operation	Behaviour
`init-translation`	`{inputModelId, outputModelId, payload, settings}` → 201 `{translationId}`.
`get-translation-result`	path parameter translation id → `{status: PENDING|IN_PROGRESS|DONE|ERROR, result, mimeType}`.
`abort-translation`	path parameter translation id; forgets the task.
